JUNCTION BOX

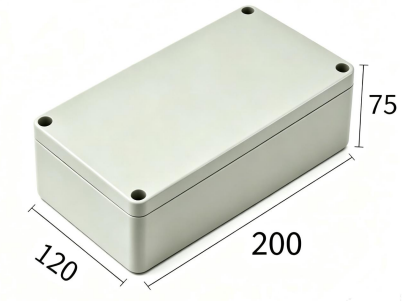
Material: ABS

Material Properties: Good impact resistance, heat resistance, lowtemperature resistance, chemical resistance, excellent electrical performance and good surface gloss.

Ingress Protection Rating: IP65

Applications: Suitable for indoor and outdoor electrical, communication and fire-fighting equipment; iron- steel smelting, petrochemical, electronics, power supply, railway, construction sites, mining sites, airports, hotels, ships, large- scale factories, coastal plants, cargo-handling terminal equipment, wastewater treatment facilities and environmental-pollution- control facilities, etc.

Installation Methods:

Iner Installation: The box is internally provided with bosses for mounting circuit boards or DIN- rail components, together with built- in brass terminal nuts. (Each waterproof box is fitted with at least two standard M4 brass nuts.)


External Installation: It can be fixed onto walls directly via mounting holes at the bottom of the box. (The four corners of the box can be fastened to walls or panels by screws or nails.)
